Election/Restrictions

Applicant's election without traverse of Species A, Claims 1-9, temperature control via flux reduction, in the reply filed on 10-17-2007 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "between a facing position with respect to said second principal surface and a non-facing position", in lines 3-4, this limitation is in definite. Claims 6 and 7 recite similar language. No face side has been defined.

Claim 4 recites "said magnetic flux reduction section is attached to said core so that an outer peripheral surface thereof", in lines 2-3, is indefinite since it is not clear what part "thereof" refers to.

Claim 5 recites "peripheral-direction end thereof". This is indefinite since no periphery-direction end has been defined.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the admitted prior art submitted in an I.D.S. filed 10-17-2005 Japan publication # 09-171889.

The prior and relevant art made of record and not relied upon is considered pertinent to applicant's disclosure. Yasuda, Yasuda'599, Asakura, Sekiguchi, Sekiguchi'608 and Nomura are cited to show structure similar to the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel L. Robinson whose telephone number is 571-272-4788. The examiner can normally be reached on m-f 5:30-2:30.
